ALGORITHM

Scoring Mechanism: Each user response corresponds to a predefined score range for each Avenger

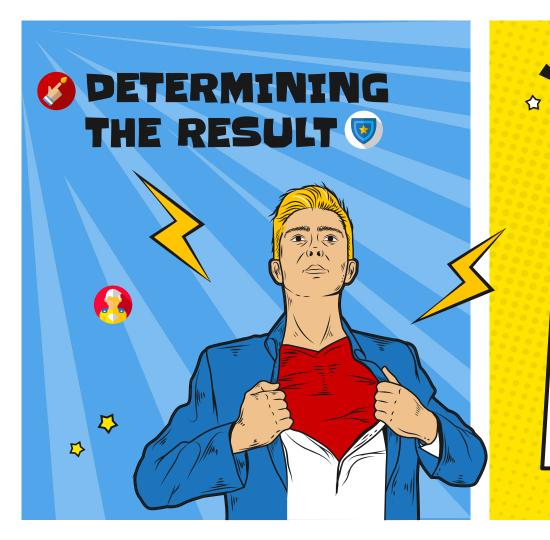

Score Translation: User responses are translated into scores by mapping their choices to the corresponding score range for each trait.

Cumulative Score Calculation: Cumulative scores for each Avenger are calculated by summing up the scores across all user responses trait.

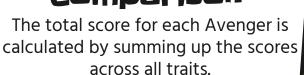

Process

By analyzing the accumulated scores, the algorithm identifies the Avenger character with the highest total score.

Reasoning

The chosen Avenger character is not arbitrary; it's based on a detailed analysis of the user's responses.

Incorporating more Marvel characters and diverse personality questions to enhance accuracy and engagement.

Future 2

Introducing interactive features like user feedback and dynamic scoring algorithms for continual improvement and user satisfaction.
